**(571) 272-3496 Knox 4B68**

## Voluntary Results Feedback Form

➤ I am an examiner in Workgroup:  Example: 3620 (optional)

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature  
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

**Comments:**

Expression usage analyzing method for organization e.g. Internet site, involves gathering preset attributes of each occurrence of expression , and compiling occurrences as function of time and storing in user accessible medium

Abstract (Basic):

... The method involves monitoring a selected **organization** for occurrences of a selected **expression** in a **time** interval. Preset attributes of each occurrence is gathered, and each occurrence is stored with its...

...in association with the interval. The monitoring, gathering and storing are repeated at another interval. **Number** of the occurrences is compiled as a function of **time** and stored in a user accessible medium (70).

... An INDEPENDENT CLAIM is also included for a system for analyzing a usage of an **expression** .

...

...Used by an **organization** e.g. Internet site, for analyzing usage of an **expression** .

...

...The method allows users to **track** not only what **competitors** are doing in a particular industry, but also what other entities perhaps related to the...

...products or services they may be developing. The method allows the user to analyze over **time** of the usage of the **expression** , such that the user is able to monitor potential developing trends in particular defined **organizations** . The method allows the user to analyze the **expressions** not only on a continuous basis, but also on global scale, so that instead of obtaining only a **snapshot** of the industry provided by an alert service, the user receives a better understanding of...

...The method provides the user a better opportunity to monitor changes as they occur over **time** in the industry versus the pockets of information the user is able to obtain in other ways. The method allows the user to select an **expression** they wish to evaluate as well as the **organizations** they want to monitor, thus providing flexibility to user. The flexibility allows the user to update the **organizations** being monitored on a regular basis permitting the user to include new **organizations** or eliminate out-of-**date organizations**. The method helps the user to maximize the accuracy of the data obtained by eliminating...

...The drawing shows a **depiction** of a layout of a method for analyzing a usage of an **expression** within an **organization**.

... **Expression** (12...

... **Organization** (14

AUTOMATIC PHOTOGRAPHING SYSTEM AND **IMAGE** SEARCH TERMINAL

PUB. NO.: 2004-282769 [JP 2004282769 A]

PUBLISHED: October 07, 2004 (20041007)

INVENTOR(s): KAKO TOSHIHIKO

APPLICANT(s): FUJI PHOTO FILM CO LTD

APPL. NO.: 2004-104952 [JP 2004104952]

Division of 2000-201548 [JP 2000201548]

FILED: March 31, 2004 (20040331)

AUTOMATIC PHOTOGRAPHING SYSTEM AND **IMAGE** SEARCH TERMINAL

INTL CLASS: H04N-005/225; **G06F-017/30** ; G06T-001/00; H04N-005/232;  
H04N-005/76

#### ABSTRACT

... BE SOLVED: To provide an automatic photographing system for automatically photographing an object and an **image search** terminal for **searching** a specific **image** by solving a problem wherein a **person** who takes a **picture** in an amusement facility has to stop each **time** photographing is **performed**, and has to stop actions for photographing in the facility for preparing and operating photographing.

SOLUTION: The automatic photographing system for automatically picking up an **image** of the object includes: one or more cameras for picking up the **image** of the object; a transmission means for **transmitting image** data; an **image** management server for preserving the **image** data; a **transmitter** for **transmitting** figure information **specifying** the object; a receiver for receiving information from the **transmitter**; and an **image** pickup timing detection part for detecting a timing determined for **image** pickup. When the predetermined **image** pickup timing is detected,

photographing is **performed** by the cameras. The system further includes the **image search** terminal for **searching** the specific **image** by inputting at least one of a figure ID and the figure information as **search** conditions.

#### ABSTRACT

PROBLEM TO BE SOLVED: To provide an electronic personal history system for guaranteeing protection of **individual information** and the originality of information.

SOLUTION: An information terminal device 8 of a user 2 inputs and prepares information, such as personal history information 26 (step 201). Personal particular information ( **name** , address, facial **portrait** , etc.), **specifying** the user 2 is not allowed to be inputted or is not **disclosed** . The information terminal device 8 uses a secret key A of the user 2 to...

... personal history information 26 (step 202). Furthermore, an information terminal device 9 of a parent **organization** 3 uses a public key A of the user 2 and a secret key B of an authentication **organization** , to attach an electronic signature 35 of the parent **organization** to received information (step 203). The electronic signature is a visually recognizable marked signature with a **time** stamp recording to **date** and **time** , when signature is **performed** . The information terminal device 9 transmits to a center server 11 the personal history information 26 attached with the electronic signature (the **person** in question) 32 and the electronic signature (authentication **organization** ) 35 attached thereto. The center server 11 uses the public keys A and B to detect alteration to received information (step 204) and **performs** registration and **disclosure** (step 205).

Detailed Description

## Claims

### Detailed Description

... such as text talk, sharing files and video conferencing. However, these applications are image and **expression** poor, limiting **participants** in how they can personalize and **express** their online persona.

What is needed is a richer information experience that provides better social...

...social interaction.

FIG. 2 is a flow chart of a system which uses the attributes **disclosed** in FIG. 1 to modify **participant** information and/or shared information.

FIG. 3 is a schematic of one embodiment of a...

...location or location relative to someone else), and temporal information (how long performing certain activity). **Expression** may include any concepts the **participant** wishes to convey such as an action (e.g., thinking, sleeping, eating, etc.), emotion (e...

...FIG. 2, there is shown a flow chart of a system which uses the attributes **disclosed** in FIG. 1 to modify **participant** information and/or shared information. At block 10, state changes are checked. State changes designate...

...automatic changes. As shown at block 13, the explicit participant input is interpreted. With explicit **participant** input, the **participant** directly specifies how identity, **expression**, and/or shared information should change. For example, the **participant** may update his or her emotion information by explicitly typing in his or her current...

...participant's electronic device makes decisions locally based on local preferences such as presence and **expression** information and media data and then sends instructions to other **participants'** electronic devices. The interactions may be independent of the content provider.

The socialization of electronic...

...other. Video conferencing, however, has severe limitations.

First, video conferencing merely regurgitates the image and **expression** of the **participants** to the shared multimedia presentation. For example, the actual image of one of the participants...various aspects of the shared information. One aspect of the content may be a specific **disclosed** in the **participant's** preferences), the avatar may be depicted as being angry. As another example, if the...

...team scoring in a sporting event. As discussed above, one, some, or all of the **participants** to a shared information session may.

have presence and/or **expression** information. This presence and/or **expression** information may describe certain aspects of the **participant** (e.g., identity, awareness, and preferences) such as indicating that a participant is a fan...

...performance of 15 the specific team, so that when the specific team scores, the **representation** may "cheer," reflecting the **team** scoring.

The **event** may be determined from the shared multimedia information in several ways. One way is to...

...modification of the representation may be based on a reaction elicited by one of the **participants** to the shared information, which may indicate **expression** information. The reaction to the shared information may either be by implicit participant input, as...

...a personal computer 20, 49.

Although referred to herein as a "set-top box," the **electronic device** which interacts with the monitor may be **located** in a variety of places in a viewer's home, or incorporated with other hardware...

...shared multimedia information, a representation may be presented. The representation may be determined based on **participant** preferences, such as presence and **expression** information. The **participant** preferences may be stored in a variety of locations such as on the set-top...

...will dictate that the representation should cheer. The appropriate instructions are sent to the other **participants**, as shown at block 86. After which, the **expression** is presented at the other **participants**, as shown at block 88.

Referring to FIG. 7, there is shown a flow diagram...

#### Claim

... of claim 1 or 2, wherein determining the avatar comprises determining an avatar to convey **expression** of the first **participant**.

15 The method of claim 1 or 2, wherein determining the avatar comprises modifying the...

Detailed Description

#### English Abstract

A web-based collaboration system allows multiple users to **organize** and manipulate visual information collaboratively in real- **time** while maintaining data associated with the visuals correlated at all times. Multiple levels of participation...

#### Detailed Description

... between multiple users, and more particularly, to system and method that allows multiple users to **organize** and manipulate visual information collaboratively in real- **time** .

#### Backaround of the Invention

The \$1 trillion global apparel industry is made up of many...

...as hereinbefore described with reference to the accompanying drawings.

It should be appreciated that real- **time** visual collaboration helps to greatly streamline and **organize** both internal and external communications/feedback, and helps to produce better-targeted products hitting the...

...invention.

#### Detailed Description

In general terms, a multi-user collaboration system allows multiple users to **organize** and manipulate visual information collaboratively in real- **time** while maintaining descriptions, threaded comments, and other data related to the visuals correlated at all...

...need for expensive and time-draining overnight shipping, long-distance phoning, travel, and meetings.

Real- **time** collaboration centered around visual information greatly streamlines and **organizes** communications and feedback. The system helps ensure better-targeted products hit the showroom floor faster...of the network.

Folders have three attributes: A list of Content (which can be any **number** of **arrangements** or elements), Sharing (the list of Users or teams able to share the Folder), and...

...identical to the original Arrangement, except the tool for the arrangement recognizes that a published **Arrangement** cannot be ,5 modified.

Real- **time** collaboration greatly streamlines and **organizes** communications and feedback. Inspirations become beautiful products as designers efficiently collaborate together. Sales people respond...

...you connect with other people, Visuality helps you really work with them, collaborating in an **organized** and easy way.

**Time** is money.

Some examples.

With an ISIDN-connection, it takes over 5 minutes to send...

...release, outside the scope of this contract.

22) Functionality to provide usage report (e.g., **number** of **arrangements** created, shared, and published, etc ... ) to user through the client module will not be implemented...

...adding companies, adjusting company licenses, assigning company administrators, and providing usage reporting I (e.g., **number** of **arrangements** shared and published, average **number** of comments created per **arrangement** shared and published, etc...). Tasks at the company level include adding and deleting users and...

...is truly a global solution, continuously helping your employees and their relationships regardless of geographic **location** or **time** zone. Visuality is not limited as to maximum **number** of users. The application is completely scalable to thousands of users, while also being extremely ...

...Tool. In one embodiment, the color palette will be preloaded with Pantone colors and their **numbers** .

Color Palette - An **Arrangement** that creates and stores a user defined library of Color Chips. The Color Palette is...

...for the functions available in the GAN Application interface. The four common tools are: Calendar, **Search** , Chat/Instant Messenger, and Flistory.

Concept - The **name** of a Folio template, created with 8 empty, pre-named rows.

Concurrent - Two or more...Slip. Content can be added by dragging into a open or closed folder.

Folio - The **second** level of **Arrangement** in the GAN Environment. A Folio can contain Elements, Folios, Storyboards and Presentations. (Previously know...)

...any GAN User by an Author. A Reviewer can view and add comments to an **Arrangement** or the elements inside it. They can see the **names** of the other users who are sharing. They can add comments and read everyone's...

Detailed Description

Claims

Detailed Description

... can barter collection items.

An example exchange platform is designed in the following way: the **participants**, from the client's website **notify** the online collection system of the electronic items they are willing to exchange for other... of all of the players that belong to a team, may redeem all of the **pictures** for a free entrance to all of the **games** of that **team** for a season.

Contrasted with points, which are common in existing loyalty programs, a collection...account as an online flipbook. The flipbook can be organized in various ways, allowing the **participant** to **specify** the way their collectibles will be viewed by them, as well as by other participants...

...particular, various forms of searching and browsing are limited only to a buddy-list of **participants** that a **participant** may **specify**.

The OC exchange module 20 is configured to allow both automatic and participantdriven barterers. The...

...pieces C will be traded for a set of pieces D. In simultaneous offers the **participant** can **specify** identical or overlapping offers to different **participants**, and the online collection system will ensure that once an offer has been accepted the...

...prizes, and a mapping from sets of collectibles to prizes. For example, this mapping may **specify** that every **participant** who gets all letters in the name "Commerce Games", where the content of each collectible... online collection system supports a clearing algorithm that allows for circular barterers. In circular barter, **participants** will **specify** what they wish to trade (e.g. a particular piece). The online collection system can aggregate the pieces **participants** may wish to trade, as well as **communicate** this information to **participants**. Within the trading process each **participant** will be able to **communicate** which of these pieces the **participant** will agree to receive for his/her own piece.

An optimal matching algorithm will clear...

...system supports a novel clearing algorithm for heterogeneous barterers. As

part of heterogeneous barter the **participants** can **specify** what they wish to trade (e.g. a particular piece). ...collection system aggregates the pieces the participants may wish to trade. After aggregating the pieces **participants** may wish to trade, and **communicating** to other system **participants** the information about the pieces that may be traded, each **participant** will be able to **communicate** which of these pieces the **participant** will agree to receive for his/her own piece. The trading process also allows for...

...12

negative, or zero) he/she associates with this trade. The trading process allows a **participant** to **specify** that he/she is willing to perform a trade, assuming he/she will receive additional...

...by modifying the entries in the online collectibles bank associated with the corresponding set of **participants**. When an exchange takes place, the corresponding **participants** are **notified** about the exchange. When a **participant** removes an offer then the offer will not be included in the set of valid...

Claim

... collection bank module comprises programming associated with said online flipbook, said programming configured to allow **participants** to **specify** the way in which at least one of said plurality of collectibles can be viewed...trade-list for said online collectible.

32 The method according to Claim 28, further comprising:

**searching** a **second** collection, said **second** collection being that of at least a **second** participant wherein said **searching** is accomplished according to constraints of said online collection system and constraints of participants of...

...a collection.

40 A method for providing an online collection system to at least one **participant**, said method comprising:

**expressing** barter offers, said barter offers include collection system support for a 15 . clearing function, said...

...for circular barterers.

41 The method according to Claim 40, wherein said circular barterers include **participants**

**specifying** particular pieces said **participants** wish to trade.

42 The method according to Claim 41, wherein said online collection system aggregates said pieces said **participants** wish to trade, and said online collection system **communicates** information about said pieces said **participants** wish to trade to other **participants**.

43 The method according to Claim 40, wherein said **expressing** barter offers include heterogeneous barter.

44 The method according to Claim 43, wherein said heterogeneous...

...pieces and points.

45 The method according to Claim 44, wherein said heterogeneous barter include **participants** aggregating said pieces said **participants** may wish to trade, **communicating** information about said pieces said **participants** may wish to trade, allowing additional payments associated with said trade, specifying willingness to perform...

Detailed Description

#### Detailed Description

... and the owner or operator of the system. It also provides services that aid in **notifying** event **participants** of the online availability of the images and **informing** them of the times and procedures for viewing them. By performing these functions and services...invention, and the network links and relationships between those components. A photographer who has taken **photographs** at a an event, such as a wedding, graduation, **sporting event**, or **portrait** sitting, may transmit the **photographs** to the E-Print STM server 10 by one of several methods and in one...the process. First, general category names through which to group the pictures are entered by **name** via create **categories** screen 116 (Fig. 15) . Pictures are then **arranged** into these categories by categorize pictures screen 117a, picture sequence screen 117b, and set sequence...

...he reviewed in the event profile review Page 292. The photographer then uses the create **categories** interface Fig.

15 to divide the photographs into **named categories** . The photographer may select from suggested **categories** , create his or her own categories, or select "Automatic" to have numbered categories created automatically...

...the categorize pictures interface (Fig. 16a) to assign each picture to one of the created **categories** . Pulldown menus beneath each picture 172 contain the **names** of the **categories** created above, and a "Delete" option. To facilitate categorization, there is the option of assigning...

...pictures interface Fig 16a. The picture sequencing interface Fig. 16b shows the photographer the created **categories** , and the **number** of images assigned to each. An autosequence button 217b is provided, which causes the E...text. For example, the photographer may caption each photo in a college graduation with the **name** of the student, enabling hosts and guests to **find** the single student's image they wish to view within the online proofbook for the...their personal proofbook at 122 for subsequent access or to compile a finished album over **time** . In this manner, all customers of

an event need not **arrange** a face to face meeting with a  
photographer, and may elect any number of prints...

**(First of three articles on The Boosters, Growing Problem in College  
Sports , reports that boosters, acting alone or in groups, are becoming  
increasingly involved in questionable activities that have led to NCAA  
investigations. Investigations focus on payments to athletes , alleged  
payoffs in form of jobs, housing, automobiles and other favors for  
parents of promising athletes and financial favors and special  
consideration for athletes once they reach campus. Many colleges find  
that it would be difficult to sustain quality teams , which, in turn,  
can be profitable source of money for athletic department and general  
fund, without funds that booster clubs provide. Photos (L).)**

(Profile of Gauchos, NYC amateur basketball team competing in nonschool leagues against YMCA and other teams, and Argentine-born coach Louis d'Almeida, Yale-educated advertising executive. D'Almeida's popular program is year-round avocation for 100 boys aged 12-19 in upper West Side of Manhattan, who must remain in school as condition for team membership. Team attracts some of best high school students in NYC, and d'Almeida reports that in '77 all of his senior players went to college. Byliner notes that team has recently attracted attention of Georgiana Bronfman and husband Edgar, chmn of Joseph E Seagram & Sons Inc. Mrs Bronfman has formed Gaucho Basketball Fund Inc to finance broadening of program including permanent gymnasium to be located in Harlem. Photo of d'Almeida with player Tyrone Joye (S).)

(US Olympic Com (USOC) to vote on establishment of yr-round natl training centers for Olympic athletes, exec com meeting, Dec 5, '76. Centers would also be used for scientific and med research. Com also hopes to start satellite training centers primarily for athletes from 10 to 15 yrs old. USOC will consider amendment to const authorizing officers to withdraw US team from future Olympic Games, as safeguard against pol pressures. Changes dates for '79 Pan Amer Games from mid-June to Aug 4-18, and confirms field hockey and roller skating as Pan Amer sports. Several com members express concern over lack of communication between USOC and organizers of '80 Winter Games at Lake Placid, NY. Internatl Olympic Com member Douglas F Roby warns USSR may attempt to prevent Radio Free Eur from receiving accreditation at '80 Summer Games. Holds USSR was responsible for RFE's failure to obtain accreditation at '76 Winter Games. Photos of Squaw Valley and of USSR gymnast Olga Korbut (M).)

shoot flash **pictures** from the stands at a **football game** or other

**event** where you're a long way from your subjects--the flash will have little effect...stop to use for the shot.

49.-53. The flash unit has a different guide **number** for each film speed (you can **find** it in the flash instruction manual). But it's a good idea to shoot a...or move the flash off-camera so that it is the same distance from the **subjects** (59).

60. The ready light **tells** you when the flash is ready to fire again--or does it? On some units...
